## Inserts, Dividers and Organisers

We can provide Tool cut foam, which is ideal for complex or detailed inserts and also for production runs. Tool cut foam gives a uniform clean cut and can be used for any purpose from the display of beauty products to the transport of sensor equipment.

Some cases are available with self-assembly inserts, which are ideal for one-off and sample cases to be prepared by our customers. Self-assembly foam allows customers the freedom to design their own layouts in their own time.

Profile foam, which is ideal for use in cases where the contents may vary and where the foam adequately holds them in situ when the case is closed, is also available. Although usually used as lid foam it is perfectly capable of being used as base foam as well.

## Inserts, Dividers and Organisers

## Inserts, Dividers and Organisers

We can also supply locating foam which is ideal for small qty orders, non-specific layouts and when appropriate tooling would not be cost effective.

This method is usually used with larger and/or heavier items.

Our other inserts include: -

Lid Organisers for our cases including organisers for folios and stationery cables, drill bits, etc.

Dividers, which are ideal for creating basic compartments for storage.

Panel frames for some of our cases to allow the fixing of interface panels into them.

## Your Requirements

We have over 25 years experience finding the right product for our customers so please contact us to discuss your requirements.
